REFURBISHED HARDWARE

REFURBISHED HARDWARE

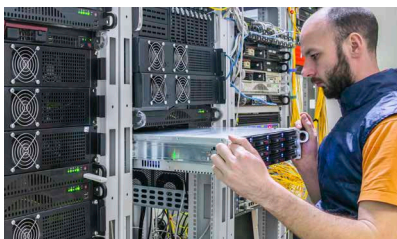

THE COST-EFFECTIVE ALTERNATIVE

HIGHLY AVAILABLE SYSTEMS AT A LOW PRICE

Do you think that only brand-new hardware is good hardware? It's simply not true! There's no need to buy expensive brand-new products in order to efficiently maintain and expand the IT infrastructure at your data center. Using refurbished hardware does the same job while sparing both your budget and the environment.

Today, so-called „old“ equipment has generally only been used for a few years in a moderate, dust-free environment. Our used but refurbished full systems, server, storage, and network devices have low levels of wear and offer full functionality and top quality. We ensure this with our 30-day guarantee. In addition, with refurbished hardware, you make a saving of **up to 50%** in comparison with buying new products.

To keep your IT equipment highly available in the long term, we also recommend professional hardware maintenance – and this, too, is available at a lower cost than from the OEM. If you choose to use Technogroup as your third-party maintenance provider, you'll benefit from the highly professional, fast, and cross-manufacturer maintenance of your data center hardware. A fixed price means that you'll enjoy financial planning reliability as well as saving **up to 70%** in comparison with the cost of maintenance from the OEM.

Thanks to our 30 years' experience in the field of refurbished hardware, we can provide you with competent advice and support you through the decision-making process. Whether you need full systems or want to expand your storage systems, increase the capacity of your tape library, or improve the performance of your servers, we can support you in all of these areas using up-to-date second-hand hardware - that's as good as new! From SSD shelves to LTO drives, we have more than 105,000 technically flawless parts in stock – ready to be shipped out or installed at your site by our certified technicians without delay.

THE BENEFITS OF USING REFURBISHED HARDWARE

The use of refurbished hardware has a whole range of benefits.

1. **Cost savings:** Save **up to 50%** in comparison with new devices.
2. **Quality:** Your hardware will meet all of the quality criteria of the manufacturer.
3. **Availability:** Trained technicians will deliver and install your hardware with fast lead times.
4. **Flexibility:** Our hardware components can be grouped together in a custom way to meet requirements.
5. **Secured with a guarantee:** Thanks to our 30-day guarantee and professional hardware maintenance, there's no need to worry about the reliability of your IT systems.
6. **A long lifetime:** Cross-manufacturer maintenance means that you'll be able to use your components for a really long time.
7. **Sustainability:** The use of refurbished hardware benefits the environment, too.

For more information, please contact us. We'll be pleased to provide you with custom, non-binding advice about the expansion of your IT infrastructure using refurbished hardware.

QUALITY AND FLEXIBILITY AT THE SAME TIME – THAT ARE UNIQUE ON THE MARKET

TECHNOGROUP HARDWARE MAINTENANCE SERVICES

- + Maintenance concept with comprehensive break/fix support
- + Replacement parts management
- + Analysis of support data for troubleshooting purposes
- + If required, remote diagnosis and further troubleshooting by system specialists with many years of experience
- + Replacement of faulty components according to manufacturer documentation

YOUR HARDWARE MAINTENANCE BENEFITS

- + Cost savings: 50-70% savings compared to OEM
- + Extension of the life-cycle of your proven technology
- + Manufacturer-independent product support after the manufacturers End of Service Life (EOSL)
