RUN DATA CENTRES SMOOTHLY AROUND THE CLOCK

These days a reliable IT landscape is the basis for almost all companies to be able to work effectively and save time. Consequently, this landscape should always meet your company's requirements. We will support you in guaranteeing your IT landscape meets your corporate needs at all times and works smoothly.

What does SPare as a Service™ involve?
SPare as a Service™ (SPaaS™) is our international spare part service that ensures you get the required spare parts at the right place and the right time.

Our aim: **Ensuring your data centre** runs without any interruptions around the clock!

IT life services

REPAIR. RE-USE. RECYCLE.

In 2021, the EU introduced a new regulation to provide more sustainability. The aim: Extending the duration of use of servers. An idea Technogroup has already been implementing for decades with its third-party maintenance (TPM) service.

Advantages of third-party maintenance:

Hardware is used well beyond the **end of service life time** set by the original equipment manufacturers.

Equipment **does not have to be prematurely scrapped** and replaced.

Refurbished hardware gives used, quality-checked components in infrastructures **a second life**.

Proper repairs avoid the unnecessary replacement of components.

Thus **avoiding electrical scrap and production emissions**.

No need for expensive new ware with partly extremely long delivery times.

SPare as a Service™ WITH EVERNEX & TECHNOGROUP

As part of Evernex, our know-how is based on more than 30 years of hardware expertise:

Sustainability and preserving the environment, energy and resources as part of our multi-vendor business model.

Thanks to third-party maintenance, using hardware in data centres well beyond the end of service life date of the OEMs.

Not only will this protect your budget, but also the environment.

We will be pleased to support you worldwide with the correct, cost-effective procurement and maintenance of your data centre hardware.

AT HOME IN EUROPE – ACTIVE WORLDWIDE
